WEDNESDAY EVENING, MAR. 27, 1895.

IF THE man or men who for some spite or other against some other man or men went into an engine house stable and crippled one of the horses there by beating it on the knee joint with a hammer, be discovered, he should be made an example of, so as to be shunned and repudiated by his race, as a being who does not belong to it and is will not be vacated until the same date. not human, for savages and barbarians are men enough to attempt to wreak their vengeance on creatures of beasts. The simple fact that such a crime has been committed in a civilized and Christian community goes far to disprove the idea that utter human depravity is impossible, for the man capable of such a crime would hesitate at no other, the commission of which required no courage.

of breaking the solid South But talk is breath. Mr. Elisios is not a Southera man, either by birth, feeling or association, and would receive no more votes in the South if he hailed from Ohio, where he was born, than from West Virginia, his latest hailing place. Then, too, not only human nature, but experience, proves that while sectional influence is potential in national elections, State feeling amounts to little or nothing, and that a republican from Ohio or Indiana is just as pop-ular in the North as one from New York, and a democrat from Texas, just

THE fact that the French government sanctions a lottery induces a New York newspaper to say that "Americans have a higher standard of political morality;than any other people." And yet the paper referred to talks more about the political immorality of the government of its own, and other cities, and of Congress, than all the others in the country. This government has, to be sure, prohibited lotteries the use of its mails, but it is a notorious fact that policy, which is much worse than lotteries, is played extensively in almost every city and town in the country, and is nearly always under the protection of political bosses.

ALL OTHER alleged grounds for a war with Spain and the seizure and annexation of Cuba having been removed, Dr. Wyman, of the Marine Hospital Service, comes to the assistance of the filibusters, and suggests to them another, which is that the troops Spain sends to Cuba to preserve law and order there, will afford good material for yellow fever, and thereby produce a pestilence, that may spread to this country. The Doctor should pick his flint and try again, for this last reason is not only less substantial than any of the others, but is positively ridiculous.

FROM WASHINGTON.

[Correspondence of the Alexandria Gazette.] WASHINGTON, March 27. Minister Thurston's formal note to Secretary Gresham announcing his departure from Washington which reached the secretary this morning, is under-

stood to be brief almost to the point of curtness. It contained no reference to a leave of absence or cause of depar-ture, but under yesterday's date simply stated that he intended to depart for Honolulu, leaving Secretary Hastings in charge of the Hawaiian Legation. The note is said by those familiar with diplomatic communications of its class, o have been remarkable for its omission of the customary courteous expla-nations and absolutely unique in failing to announce whether his government had or had not given him leave of

THOUGHT SHE WAS A WITCH .- A most extraordinary case of murder, arising from superstition, was inquired into yesterday by the Special Court of Clonmel, twenty-five miles from Waterford, Ireland. Ten persons were arraigned before the court charged with the murdering a women named Cleary, because they supposed her to be a witch. The prisoners included the woman's husband and father. The evdence showed that Mrs. Cleary was suffering from nervousness and bronchitis, and her husband, believing her to be hewitched and in order to exorcise the evil spirit, obtained a concoction from

herbalist of the neighborhood. Then, while the other prisoners held the unfortunate woman in bed, her husband forced the obnoxious concoction of herbs down her throat. After this the suffering woman was held over a fire and dreadfully burned, until she declared in the name of God that she was not Cleary's wife. This torture was repeated on the following day, but the woman refused to conform to her husband's requests, whereupon he knocked her down, stripped off her clothing, poured paraffine over her body, then lighted it, and the woman burned to death in the presence of six male and two female relatives.

Cleary declared that he was not burning his wife, but that he was hurning a witch, and that she would disappear up the chimney.

When the woman was dead, her husband collected her charred remains in a sheet and buried them in a dyke, beneath the mud, where they were found a week later. The prisoners, who were remanded, narrowly escaped lynching at the hands of an excited and had to be removed to jail under escort of a strong force of constabulary.

Destructive Fire.

MILWAUKEE, Wis., Mar. 27.— At 2:45 o'clock this morning one of the worst of the many de-structive fires in the history of this city was finally got under control. At that time over \$1,000,000 worth of property had been destroyed and twenty business firms had lost their stock and buildings. There were also many minor losses, including offices, flats and small shops. The fire originated at a few minutes after midnight, and the entire department, with the two fire boats, was soon at the scene. Fifteen minutes after the fire broke out it looked as if the entire block would go and that the fire would sweep eastward to the river, but the firemen, by heroic work, held it in check. Several large clothing houses, and a number of dry goods and other business houses together with the Y. M. C. A. building were entirely destroyed, and the Foster building, the Public Library building and several other structures were seriously damo'clock It was nearly three when the fire department gained con trol of the conflagration, although this morning engines were still playing upon piles of debris. So far as known, however, there was no loss of life, a fact that is remarkable in view of the fierceness of the fire and the frequency with which walls fell in the vicinity of the watching crowds. cable dispatch says the government has issued a bulletin claiming a victory over the rebels at Goyaca. It was a costly one, however, for out of the three thousand troops under General Reyes, which formed the expedition, 1,500 dropped off through fatigue or disease during the march, and of the remaining 1,500, which gave battle to the rebels, seven hundred were killed.
